

2010 License Transfer Request

1. Original license server associated with the Software License Agreement between DownStream Technologies, and _____ (“Licensee”):

The HostID and Host Name for the **CURRENT** license server:

HostID (Ethernet Card Serial Number): Include all 12 characters.	
Host Name (Computer Name):	

2. New license server designated for the transfer of the software license(s):

The HostID and Host Name for the **NEW** license server

NOTE: VIRTUAL SERVERS (a.k.a. VMWare) ARE SUPPORTED BY USB KEY ONLY

HostID (Ethernet Card Serial Number): Include all 12 characters.	
Host Name (Computer Name):	

Or Transfer to a USB key (check here) (additional fees may apply)

3. The undersigned authorized agent of Licensee certifies that the DownStream Technologies software license(s) that were resident on the original license server have been deleted and/or erased in their entirety and that no DownStream Technologies software license(s) are currently installed and will not be installed or used on the original license server at any time without purchasing a new right to use license.
4. On receipt of this document and the license transfer fee at DownStream Technologies, a new software license(s) will be issued for the new license server and the applicable software license records will be modified to reflect this transfer.
5. All terms and conditions of the DownStream Technologies Software License Agreement continue to be in effect with this transfer of the software license from the original license server to the new license server.
6. Subject to account review of contract status and transfer history. License Transfer fees may apply.
